

Pig C-Peptide ELISA Kit | C-Peptide elisa kit

Pig C-Peptide ELISA Kit

CATALOG #
AAA190444

REACTIVITY
Pig

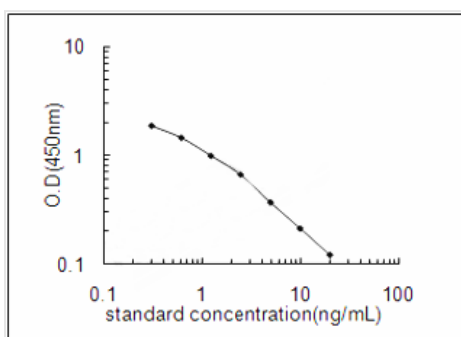

PRODUCT SYNONYMS

C-Peptide; Pig C-Peptide ELISA Kit; C-Peptide elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pig
Specificity	This assay recognizes recombinant and natural Pig C-Peptide. No significant cross-reactivity or interference was observed.
Samples	Serum, plasma, tissue homogenates, cell culture supernates, and other biological fluids
Assay Type	Quantitative Competitive
Detection Range	0.31 -20.0 ng/mL
Preparation and Storage	For long term storage, please store the entire kit at -20 degree C.

Related Product Information for C-Peptide elisa kit

Intended Uses: This immunoassay kit allows for the in vitro quantitative determination of pig C-Peptide concentrations in serum, plasma, tissue homogenates, cell culture supernates, and other biological fluids.

Principle of the Assay: The ELISA is based on the competitive binding enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with an antibody specific to C-Peptide. During the reaction, C-Peptide in the sample or standard competes with a fixed amount of biotin-labeled C-Peptide for sites on a pre-coated Monoclonal antibody specific to C-Peptide. Excess conjugate and unbound sample or standard are washed from the plate. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of C-Peptide in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
