ADDITIONAL INFORMATION

Related Product Information for SMARCA4 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Transcription activator BRG1 (also known as SMARCA4) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human SMARCA4 antibody. SMARCA4 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human SMARCA4 Antibody is added and binds to SMARCA4 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated SMARCA4 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human SMARCA4. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
