

Pig Hemopexin ELISA Kit | HPX elisa kit

Pig Hemopexin ELISA Kit

CATALOG #
AAA191109

REACTIVITY
Pig

PRODUCT SYNONYMS

Hemopexin; Pig Hemopexin ELISA Kit; Hyaluronidase; HPX; 3.2.1.35; HPX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pig
Sequence Length	459
Samples	Serum, plasma, tissue homogenates, cell culture supernates or other biological fluids
Assay Type	Competitive
Preparation and Storage	For long term storage, please store the entire kit at -20 degree C.

Intended Uses: This immunoassay kit allows for the in vitro quantitative determination of target antigen concentrations in serum, plasma, tissue homogenates, cell culture supernates or other biological fluids.

Principle of the Assay: The ELISA is based on the competitive binding enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with an antibody specific to target antigen. During the reaction, target antigen in the sample or standard competes with a fixed amount of biotin-labeled target antigen for sites on a pre-coated antibody specific to target antigen. Excess conjugate and unbound sample or standard are washed from the plate. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm $\pm$ 2 nm. The concentration of target antigen in the samples is then determined by comparing the O.D. of the samples to the standard curve.
