

Human Lysine-specific histone demethylase 1A ELISA Kit | KDM1A elisa kit

Human Lysine-specific histone demethylase 1A ELISA Kit

CATALOG #
AAA196158

REACTIVITY
Human

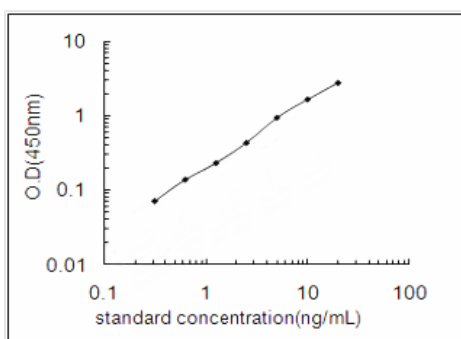

PRODUCT SYNONYMS

Lysine-specific histone demethylase 1A; Human Lysine-specific histone demethylase 1A ELISA Kit; BRAF35-HDAC complex protein BHC110; Flavin-containing amine oxidase domain-containing protein 2; KDM1A; AOF2; KDM1; KIAA0601; LSD1; 1.-.-.; KDM1A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	872
Samples	Serum, Plasma, Tissue Homogenates, Cell Culture Supernates Or Other Biological Fluids.
Preparation and Storage	For long term storage, please store the entire kit at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for KDM1A elisa kit

Intended Uses: This immunoassay kit allows for the in vitro quantitative determination of target antigen concentrations in serum, plasma, tissue homogenates, cell culture supernates or other biological fluids.

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to target antigen. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific for target antigen and then avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then a TMB substrate solution is added to each well. Only those wells that contain target antigen, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of target antigen in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	194294493
NCBI GeneID	500569

NCBI Accession #	NP_001123570.1
NCBI GenBank Nucleotide #	NM_001130098.1
NCBI Official Full Name	lysine-specific histone demethylase 1A
NCBI Official Synonym Full Names	lysine demethylase 1A
NCBI Official Symbol	Kdm1a
NCBI Official Synonym Symbols	Aof2; Kdm1; RGD1562975
NCBI Protein Information	lysine-specific histone demethylase 1A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
