ADDITIONAL INFORMATION

Related Product Information for anti-FADD antibody	This is a rabbit polyclonal antibody against Fadd. It was validated on Western Blot using a cell lysate as a positive control. Target Description: Fadd is apoptotic adaptor molecule that recruits caspase-8 or caspase-10 to the activated Fas (CD95) or TNFR-1 receptors. The resulting aggregate called the death-inducing signaling complex (DISC) performs caspase-8 proteolytic activation. Active caspase-8 initiates the subsequent cascade of caspases mediating apoptosis.
