ADDITIONAL INFORMATION

Related Product Information for anti-KDM4C antibody	This is a rabbit polyclonal antibody against JMJD2C. It was validated on Western Blot Target Description: JMJD2C is a member of the Jumonji domain 2 (JMJD2) family. It contains one JmjC domain, one JmjN domain, two PHD-type zinc fingers, and two Tudor domains. This nuclear protein functions as a trimethylation-specific demethylase, converting specific trimethylated histone residues to the dimethylated form. Chromosomal aberrations and increased transcriptional expression of this gene are associated with esophageal squamous cell carcinoma.
