ADDITIONAL INFORMATION

Related Product Information for anti-SUFU antibody	This is a rabbit polyclonal antibody against SUFU. It was validated on Western Blot using a cell lysate as a positive control. Target Description: SUFU is a component of the Sonic hedgehog (SHH; MIM 600725)/Patched (PTCH; MIM 601309) signaling pathway. Mutations in genes encoding components of this pathway are deleterious for normal development and are associated with cancer-predisposing syndromes.SUFU encodes a component of the sonic hedgehog (SHH; MIM 600725)/patched (PTCH; MIM 601309) signaling pathway. Mutations in genes encoding components of this pathway are deleterious for normal development and are associated with cancer-predisposing syndromes (e.g., HPE3, MIM 142945; BCNS, MIM 109400; and GCPS, MIM 175700).[supplied by OMIM].
