ADDITIONAL INFORMATION

Related Product Information for anti-RNF13 antibody	This is a rabbit polyclonal antibody against RNF13. It was validated on Western Blot using a cell lysate as a positive control. Target Description: RNF13 contains 1 RING-type zinc finger. The exact function of RNF13 is not known.The protein encoded by this gene contains a RING zinc finger, a motif known to be involved in protein-protein interactions. The specific function of this gene has not yet been determined. Alternatively spliced transcript variants that encode the same protein have been reported. A pseudogene, which is also located on chromosome 3, has been defined for this gene.
