ADDITIONAL INFORMATION

Related Product Information for anti-ASIC1 antibody	This is a rabbit polyclonal antibody against ASIC1. It was validated on Western Blot Target Description: This gene encodes a member of the acid-sensing ion channel (ASIC) family of proteins, which are part of the degenerin/epithelial sodium channel (DEG/ENaC) superfamily. Members of the ASIC family are sensitive to amiloride and function in neurotransmission. The encoded proteins function in learning, pain transduction, touch sensation, and development of memory and fear. Alternatively spliced transcript variants have been described.
