ADDITIONAL INFORMATION

Related Product Information for anti-RNF10 antibody	This is a rabbit polyclonal antibody against RNF10. It was validated on Western Blot using a cell lysate as a positive control. Target Description: RNF10 contains a ring finger motif, which is known to be involved in protein-protein interactions. The specific function of this protein has not yet been determined. EST data suggests the existence of multiple alternatively spliced transcript variants, however, their full length nature is not known.
