ADDITIONAL INFORMATION

Related Product Information for anti-JAZF1 antibody	This is a rabbit polyclonal antibody against JAZF1. It was validated on Western Blot using a cell lysate as a positive control. Target Description: JAZF1 is a nuclear protein with three C2H2-type zinc fingers, and functions as a transcriptional repressor. Chromosomal aberrations involving this gene are associated with endometrial stromal tumors. This gene encodes a nuclear protein with three C2H2-type zinc fingers, and functions as a transcriptional repressor. Chromosomal aberrations involving this gene are associated with endometrial stromal tumors. Alternatively spliced variants which encode different protein isoforms have been described; however, not all variants have been fully characterized.
