ADDITIONAL INFORMATION

Related Product Information for anti-SF3B1 antibody	This is a rabbit polyclonal antibody against SF3B1. It was validated on Western Blot and immunohistochemistry Target Description: SF3B1 is the subunit 1 of the splicing factor 3b protein complex. Splicing factor 3b, together with splicing factor 3a and a 12S RNA unit, forms the U2 small nuclear ribonucleoproteins complex (U2 snRNP). The splicing factor 3b/3a complex binds pre-mRNA upstream of the intron's branch site in a sequence independent manner and may anchor the U2 snRNP to the pre-mRNA. Splicing factor 3b is also a component of the minor U12-type spliceosome.
