ADDITIONAL INFORMATION

Related Product Information for anti-SLC22A1 antibody	<p>This is a rabbit polyclonal antibody against SLC22A1. It was validated on Western Blot and immunohistochemistry</p> <p>Target Description: Polyspecific organic cation transporters in the liver, kidney, intestine, and other organs are critical for elimination of many endogenous small organic cations as well as a wide array of drugs and environmental toxins. SLC22A1 contains twelve putative transmembrane domains and is a plasma integral membrane protein. Polyspecific organic cation transporters in the liver, kidney, intestine, and other organs are critical for elimination of many endogenous small organic cations as well as a wide array of drugs and environmental toxins. This gene is one of three similar cation transporter genes located in a cluster on chromosome 6. The encoded protein contains twelve putative transmembrane domains and is a plasma integral membrane protein. Two transcript variants encoding two different isoforms have been found for this gene, but only the longer variant encodes a functional transporter.</p>
