ADDITIONAL INFORMATION

Related Product Information for anti-FBXO25 antibody	This is a rabbit polyclonal antibody against FBXO25. It was validated on Western Blot and immunohistochemistry Target Description: FBXO25 is a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. FBXO25 belongs to the Fbxs class.
