ADDITIONAL INFORMATION

Related Product Information for anti-PGK1 antibody	This is a rabbit polyclonal antibody against PGK1. It was validated on Western Blot and immunohistochemistry Target Description: PGK1 is a glycolytic enzyme that catalyzes the conversion of 1,3-diphosphoglycerate to 3-phosphoglycerate. The protein may also act as a cofactor for polymerase alpha. The protein encoded by this gene is a glycolytic enzyme that catalyzes the conversion of 1,3-diphosphoglycerate to 3-phosphoglycerate. The encoded protein may also act as a cofactor for polymerase alpha. A pseudogene of this gene has been found on the X-chromosome and another on chromosome 19. Publication Note: This RefSeq record includes a subset of the publications that are available for this gene. Please see the Entrez Gene record to access additional publications.
