ADDITIONAL INFORMATION

Related Product Information for anti-DHDDS antibody	This is a rabbit polyclonal antibody against DHDDS. It was validated on Western Blot Target Description: The protein encoded by this gene catalyzes cis-prenyl chain elongation to produce the polyprenyl backbone of dolichol, a glycosyl carrier lipid required for the biosynthesis of several classes of glycoproteins. Mutations in this gene are associated with retinitis pigmentosa type 59. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.
