ADDITIONAL INFORMATION

Related Product Information for anti-PLXDC1 antibody	This is a rabbit polyclonal antibody against PLXDC1. It was validated on Western Blot using a cell lysate as a positive control. Target Description: PLXDC1 (TEM7) may play significant role in proliferation and maintenance of neovascular endothelial cells in fibrovascular membranes. TEM7 may be molecular target for new therapeutic strategies for proliferative diabetic retinopathy. The expression level of TEM7 closely parallels histology-based prognostication of osteogenic sarcoma metastasis and, therefore, it is a therapeutic target.
