Related Product Information for anti-DCAF4 antibody

This is a rabbit polyclonal antibody against WDR21A. It was validated on Western Blot using a cell lysate as a positive control.

Target Description: WDR21A is a WD repeat-containing protein. The function of WDR21A remains unknown. This gene encodes a WD repeat-containing protein. Multiple alternatively spliced transcript variants have been found for this gene, but the full-length nature of some variants has not been defined.
