

General Alpha-Tocopherol (TCPa) ELISA Kit | TCPa elisa kit

General Alpha-Tocopherol (TCPa) ELISA Kit

CATALOG #
AAA20068

REACTIVITY
General

PRODUCT SYNONYMS

Alpha-Tocopherol (TCPa); General Alpha-Tocopherol (TCPa) ELISA Kit; VE; Vitamin E; alpha-TCP; alpha-Tocopherol; a-TCP; a-Tocopherol; TCPa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of TCPa. No significant cross-reactivity or interference between TCPa and analogues was observed.
Assay Type	Quantitative Competitive
Samples	Serum, plasma and other biological fluids
Detection Range	1.23-100ug/mL
Sensitivity	< 0.52ug/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TCPa were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TCPa were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TCPa elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to TCPa has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled TCPa and unlabeled TCPa (Standards or samples) with the pre-coated antibody specific to TCPa. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of TCPa in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of TCPa in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of TCPa in serum, plasma and other biological fluids.
Product Categories/Family for TCPa elisa kit	Metabolic pathway; Nutrition metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
