ADDITIONAL INFORMATION

Related Product Information for anti-MYL6 antibody	This is a rabbit polyclonal antibody against MYL6. It was validated on Western Blot using a cell lysate as a positive control. Target Description: MYL6 contains 3 EF-hand domains. It is the regulatory light chain of myosin. MYL6 does not bind calcium. Myosin is a hexameric ATPase cellular motor protein. It is composed of two heavy chains, two nonphosphorylatable alkali light chains, and two phosphorylatable regulatory light chains. This gene encodes a myosin alkali light chain that is expressed in smooth muscle and non-muscle tissues. Genomic sequences representing several pseudogenes have been described and two transcript variants encoding different isoforms have been identified for this gene.
