ADDITIONAL INFORMATION

Related Product Information for anti-USF2 antibody	This is a rabbit polyclonal antibody against USF2. It was validated on Western Blot Target Description: This gene encodes a member of the basic helix-loop-helix leucine zipper family, and can function as a cellular transcription factor. The encoded protein can activate transcription through pyrimidine-rich initiator (Inr) elements and E-box motifs. Two transcript variants encoding distinct isoforms have been identified for this gene.
