ADDITIONAL INFORMATION

Related Product Information for anti-CUL4B antibody	This is a rabbit polyclonal antibody against Cul4b. It was validated on Western Blot Target Description: Cul4b is a core component of multiple cullin-RING-based E3 ubiquitin-protein ligase complexes which mediate the ubiquitination and subsequent proteasomal degradation of target proteins. The functional specificity of the E3 ubiquitin-protein ligase complex depends on the variable substrate recognition subunit. CUL4B may act within the complex as a scaffold protein, contributing to catalysis through positioning of the substrate and the ubiquitin-conjugating enzyme.
