ADDITIONAL INFORMATION

Related Product Information for anti-SUMF1 antibody	This is a rabbit polyclonal antibody against SUMF1. It was validated on Western Blot Target Description: This gene encodes an enzyme that catalyzes the hydrolysis of sulfate esters by oxidizing a cysteine residue in the substrate sulfatase to an active site 3-oxoalanine residue, which is also known as C-alpha-formylglycine. Mutations in this gene cause multiple sulfatase deficiency, a lysosomal storage disorder. Alternative splicing results in multiple transcript variants.
