ADDITIONAL INFORMATION

Related Product Information for anti-IL26 antibody	This is a rabbit polyclonal antibody against IL26. It was validated on Western Blot Target Description: This gene was identified by its overexpression specifically in herpesvirus samimiri-transformed T cells. The encoded protein is a member of the IL10 family of cytokines. It is a secreted protein and may function as a homodimer. This protein is thought to contribute to the transformed phenotype of T cells after infection by herpesvirus samimiri.
