ADDITIONAL INFORMATION

Related Product Information for anti-FCGR2C antibody	This is a rabbit polyclonal antibody against FCGR2C. It was validated on Western Blot Target Description: This gene encodes one of three members of a family of low-affinity immunoglobulin gamma Fc receptors found on the surface of many immune response cells. The encoded protein is a transmembrane glycoprotein and may be involved in phagocytosis and clearing of immune complexes. An allelic polymorphism in this gene results in both coding and non-coding variants.
