ADDITIONAL INFORMATION

Related Product Information for anti-ALDH16A1 antibody	This is a rabbit polyclonal antibody against ALDH16A1. It was validated on Western Blot Target Description: This gene encodes a member of the aldehyde dehydrogenase superfamily. The family members act on aldehyde substrates and use nicotinamide adenine dinucleotide phosphate (NADP) as a cofactor. This gene is conserved in chimpanzee, dog, cow, mouse, rat, and zebrafish. The protein encoded by this gene interacts with maspardin, a protein that when truncated is responsible for Mast syndrome. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
