ADDITIONAL INFORMATION

Related Product Information for anti-F2RL3 antibody	This is a rabbit polyclonal antibody against F2RL3. It was validated on Western Blot Target Description: Coagulation factor II (thrombin) receptor-like 3 (F2RL3) is a member of the large family of 7-transmembrane-region receptors that couple to guanosine-nucleotide-binding proteins. F2RL3 is also a member of the protease-activated receptor family. F2RL3 is activated by proteolytic cleavage of its extracellular amino terminus. The new amino terminus functions as a tethered ligand and activates the receptor. F2RL3 is activated by thrombin and trypsin.
