ADDITIONAL INFORMATION

Related Product Information for anti-HTR1A antibody	This is a rabbit polyclonal antibody against HTR1A. It was validated on Western Blot using a cell lysate as a positive control. Target Description: This is one of the several different receptors for 5- hydroxytryptamine (serotonin), a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. The activity of this receptor is mediated by G proteins that inhibits adenylate cyclase activity.
