

Human Surfactant Protein A (SP-A) ELISA Kit | SP-A elisa kit

Human Surfactant Protein A (SP-A) ELISA Kit

CATALOG #
AAA202317

REACTIVITY
Human

PRODUCT SYNONYMS

Surfactant Protein A (SP-A); Human Surfactant Protein A (SP-A) ELISA Kit; SP-A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	278
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	12.5 pg/ml-200 pg/ml
Sensitivity	1 pg/ml

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for SP-A elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of SP-A in the sample, This SP-A ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus SP-A concentration. The concentration of SP-A in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	402150
NCBI Official Full Name	surfactant protein A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
