

Human Hepatitis C Virus (HCV) ELISA Kit | HCV elisa kit

Human Hepatitis C Virus (HCV) ELISA Kit

CATALOG #
AAA202327

REACTIVITY
Human

PRODUCT SYNONYMS

Hepatitis C Virus (HCV); Human Hepatitis C Virus (HCV) ELISA Kit; HCV elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	3033
Sensitivity	0.1 ng/mL
Intra-assay Precision	Intra-assay CV is less than 15%.
Inter-assay Precision	Inter-assay CV is less than 15%.

ADDITIONAL INFORMATION

Related Product Information for HCV elisa kit

Intended Uses: This HCV ELISA kit is intended Laboratory for Research use only!. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of HCV in the sample, this HCV ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus HCV concentration. The concentration of HCV in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	295901482
NCBI Official Full Name	hepatitis C virus polyprotein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
