

## Human Activated Coagulation Factor XII (FXIIb) ELISA Kit | FXIIb elisa kit

Human Activated Coagulation Factor XII (FXIIb) ELISA Kit

CATALOG #  
AAA202604

REACTIVITY  
Human

### PRODUCT SYNONYMS

Activated Coagulation Factor XII (FXIIb); Human Activated Coagulation Factor XII (FXIIb) ELISA Kit; FXIIb elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 100 pg/ml-1600 pg/ml                                              |
| Sensitivity     | 10 pg/ml                                                          |

### ADDITIONAL INFORMATION

#### Related Product Information for FXIIb elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of F XII in the sample, this F XII ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus F XII concentration. The concentration of F XII in the samples is then determined by comparing the O.D. of the samples to the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
