

## Human Very Low Density Lipoprotein (VLDL) ELISA Kit | VLDL elisa kit

Human Very Low Density Lipoprotein (VLDL) ELISA Kit

CATALOG #  
**AAA202656**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Very Low Density Lipoprotein (VLDL); Human Very Low Density Lipoprotein (VLDL) ELISA Kit; VLDL elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Sequence Length | 97                                                                |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 1 mmol/L-16 mmol/L                                                |
| Sensitivity     | 0.1 mmol/L                                                        |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for VLDL elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of VLDL in the sample, This VLDL ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus VLDL concentration. The concentration of VLDL in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |                                       |
|-------------------------|---------------------------------------|
| NCBI GI #               | 452883489                             |
| NCBI Official Full Name | very low density lipoprotein, partial |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
