

Human Staphylococcal Protein A (SPA) ELISA Kit | SPA elisa kit

Human Staphylococcal Protein A (SPA) ELISA Kit

CATALOG #
AAA202703

REACTIVITY
Human

PRODUCT SYNONYMS

Staphylococcal Protein A (SPA); Human Staphylococcal Protein A (SPA) ELISA Kit; SPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	528
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	1.25ng/ml-20ng/ml
Sensitivity	0.1 ng/ml

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for SPA elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of SPA in the sample, This SPA ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus SPA concentration. The concentration of SPA in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1677362333
NCBI Official Full Name	Staphylococcal protein A

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
