

## Human Soluble Fibrin Monomer Complex (SFMC) ELISA Kit | SFMC elisa kit

Human Soluble Fibrin Monomer Complex (SFMC) ELISA Kit

CATALOG #  
**AAA202838**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Soluble Fibrin Monomer Complex (SFMC); Human Soluble Fibrin Monomer Complex (SFMC) ELISA Kit; SFMC elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Sequence Length | 230                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 2 mug/ml-32 mug/ml                                                |
| Sensitivity     | 0.1 mug/ml                                                        |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for SFMC elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of SFMC in the sample, This SFMCKit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus SFMC concentration. The concentration of SFMC in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                           |             |
|---------------------------|-------------|
| NCBI GI #                 | 24111899    |
| NCBI Accession #          | NP_706409.1 |
| NCBI GenBank Nucleotide # | NP_706409.1 |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
