

## Human Cryoglobulin (CG) ELISA Kit | CG elisa kit

Human Cryoglobulin (CG) ELISA Kit

CATALOG #  
**AAA202867**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Cryoglobulin (CG); Human Cryoglobulin (CG) ELISA Kit; CG elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 7.5 mug/ml-120 mug/ml                                             |
| Sensitivity     | 0.1 mug/ml                                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for CG elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of CG in the sample, This CG ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus CG concentration. The concentration of CG in the samples is then determined by comparing the O.D. of the samples to the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
