

Human Latent Membrane Protein-1 (LMP-1) ELISA Kit | LMP-1 elisa kit

Human Latent Membrane Protein-1 (LMP-1) ELISA Kit

CATALOG #
AAA203032

REACTIVITY
Human

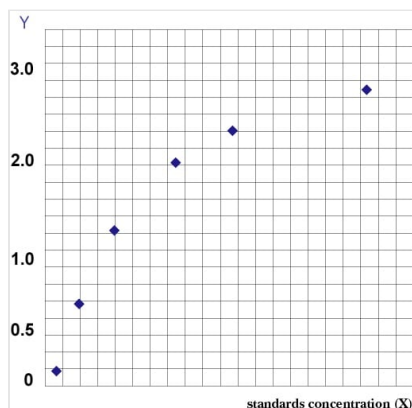

PRODUCT SYNONYMS

Latent Membrane Protein-1 (LMP-1); Human Latent Membrane Protein-1 (LMP-1) ELISA Kit; LMP-1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	54
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	3ng/ml-48ng/ml
Sensitivity	0.1 ng/ml

IMAGES

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for LMP-1 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of LMP-1 in the sample, This LMP-1 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus LMP-1 concentration. The concentration of LMP-1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	6653380
NCBI Official Full Name	latent membrane protein-1, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
