

Human Thymosin Alpha1 ELISA Kit

Human Thymosin Alpha1 ELISA Kit

CATALOG #
AAA203349

REACTIVITY
Human

PRODUCT SYNONYMS

Thymosin Alpha1; Human Thymosin Alpha1 ELISA Kit; Thymosin Alpha1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	28
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	150 pg/ml-2400 pg/ml
Sensitivity	10 pg/ml

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for Thymosin Alpha1 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Thymosin alpha1 in the sample, This Thymosin alpha1 Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Thymosin alpha1 concentration. The concentration of Thymosin alpha1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	229628
NCBI Official Full Name	thymosin alpha1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
