

Human Papillomavirus 16 ELISA Kit

Human Papillomavirus 16 Antibody ELISA Kit

CATALOG #
AAA203772

REACTIVITY
Human

PRODUCT SYNONYMS

Papillomavirus 16; Human Papillomavirus 16 Antibody ELISA Kit; Papillomavirus 16 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	505
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	50 U/mL-800 U/mL
Sensitivity	1 U/ml

ADDITIONAL INFORMATION

Related Product Information for Papillomavirus 16 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Papillomavirus 16 antibody in the sample, This Papillomavirus 16 antibody ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Papillomavirus 16 antibody concentration. The concentration of Papillomavirus 16 antibody in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	15212105
NCBI Official Full Name	HPV 16 L1 capsid protein

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
