

Human HPV-IgG ELISA Kit | HPV-IgG elisa kit

Human HPV-IgG ELISA Kit

CATALOG #
AAA203863

REACTIVITY
Human

PRODUCT SYNONYMS

HPV-IgG; Human HPV-IgG ELISA Kit; HPV-IgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	40 IU/mL-640 IU/mL
Sensitivity	1 IU/ml
Intra-assay Precision	Intra-assay CV is less than 15%.
Inter-assay Precision	Inter-assay CV is less than 15%.

Related Product Information for HPV-IgG elisa kit

Intended Uses: This HPV-IGG ELISA kit is intended Laboratory for Research use only and is not for use in test or therapeutic procedures. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of HPV-IGG in the sample, this HPV-IGG ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus HPV-IGG concentration. The concentration of HPV-IGG in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
