

Human Complex I ELISA Kit

Human Complex I ELISA Kit

CATALOG #
AAA203996

REACTIVITY
Human

PRODUCT SYNONYMS

Complex I; Human Complex I ELISA Kit; Complex I elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	281
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	2.5 U/mL-40 U/mL
Sensitivity	0.1 U/ml

ADDITIONAL INFORMATION

Related Product Information for Complex I elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human complex I in the sample, This Human complex I Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Human complex I concentration. The concentration of Human complex I in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1498554423
NCBI Official Full Name	complex I

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
