

Human Arginine ELISA Kit

Human Arginine ELISA Kit

CATALOG #
AAA204456

REACTIVITY
Human

PRODUCT SYNONYMS

Arginine; Human Arginine ELISA Kit; Arginine elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	754
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	18.75 mmol/L-300 mmol/L
Sensitivity	1 mmol/L

ADDITIONAL INFORMATION

Related Product Information for Arginine elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human Arginine in the sample, This Human Arginine Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Human Arginine concentration. The concentration of Human Arginine in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1057487768
NCBI Official Full Name	arginine

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
