

Human Membrane Attack Complex ELISA Kit

Human Membrane Attack Complex ELISA Kit

CATALOG #
AAA204613

REACTIVITY
Human

PRODUCT SYNONYMS

Membrane Attack Complex; Human Membrane Attack Complex ELISA Kit; Membrane Attack Complex elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	10 pg/ml-160 pg/ml
Sensitivity	1 pg/ml

ADDITIONAL INFORMATION

Related Product Information for Membrane Attack Complex elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of MEMBRANE ATTACK COMPLEX in the sample, This MEMBRANE ATTACK COMPLEX ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus MEMBRANE ATTACK COMPLEX concentration. The concentration of MEMBRANE ATTACK COMPLEX in the samples is then determined by comparing the O.D. of the samples to the standard curve.
