

Human Collagen Type VI ELISA Kit

Human Collagen Type VI ELISA Kit

CATALOG #
AAA204655

REACTIVITY
Human

PRODUCT SYNONYMS

Collagen Type VI; Human Collagen Type VI ELISA Kit; Collagen Type VI elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	17
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	10ng/ml-160ng/ml
Sensitivity	1 ng/ml

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for Collagen Type VI elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Collagen Type VI in the sample, This Collagen Type VI ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Collagen Type VI concentration. The concentration of Collagen Type VI in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	546559
NCBI Official Full Name	collagen type VI alpha 1 chain, collagen alpha 1(VI) {C-terminal, globular domain}

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
