

Human Heparin ELISA Kit

Human Heparin ELISA Kit

CATALOG #
AAA204674

REACTIVITY
Human

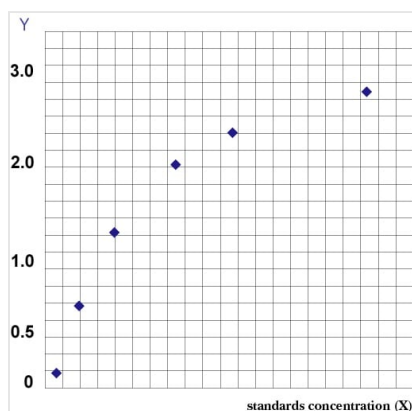

PRODUCT SYNONYMS

Heparin; Human Heparin ELISA Kit; Heparin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	250ng/ml-4000ng/ml
Sensitivity	10 ng/ml

ADDITIONAL INFORMATION

Related Product Information for Heparin elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of HEPARIN in the sample, this HEPARIN ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus HEPARIN concentration. The concentration of HEPARIN in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
