

Human Fatty Acid ELISA Kit

Human Fatty Acid ELISA Kit

CATALOG #
AAA204714

REACTIVITY
Human

PRODUCT SYNONYMS

Fatty Acid; Human Fatty Acid ELISA Kit; Fatty Acid elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	2092
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	100 mumol/L-1600 mumol/L
Sensitivity	10 mumol/L

ADDITIONAL INFORMATION

Related Product Information for Fatty Acid elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of FATTY ACID in the sample, This FATTY ACID ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus FATTY ACID concentration. The concentration of FATTY ACID in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	635514068
NCBI Official Full Name	fatty acid

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
