

Human Platelet Associated IgG ELISA Kit

Human Platelet Associated IgG ELISA Kit

CATALOG #
AAA204967

REACTIVITY
Human

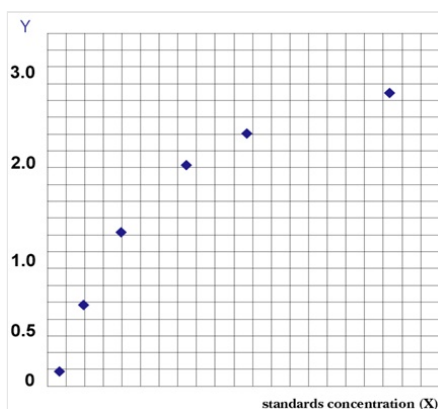

PRODUCT SYNONYMS

Platelet Associated IgG; Human Platelet Associated IgG ELISA Kit; Platelet Associated IgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	2.5ng/ml-40ng/ml
Sensitivity	0.1 ng/ml

ADDITIONAL INFORMATION

Related Product Information for Platelet Associated IgG elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human platelet associated IgG in the sample, This Human platelet associated IgG Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Human platelet associated IgG concentration. The concentration of Human platelet associated IgG in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
