

## Human Beta-Glucosidase ELISA Kit

Human beta-Glucosidase ELISA Kit

CATALOG #  
**AAA205036**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Beta-Glucosidase; Human beta-Glucosidase ELISA Kit; Beta-Glucosidase elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Sequence Length | 860                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 2 U/mL-32 U/mL                                                    |
| Sensitivity     | 0.1 U/ml                                                          |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for Beta-Glucosidase elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human beta-Glucosidase in the sample, This Human beta-GlucosidaseKit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus Human beta-Glucosidase concentration. The concentration of Human beta-Glucosidase in the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION

|                         |                  |
|-------------------------|------------------|
| NCBI GI #               | 7009581          |
| NCBI Official Full Name | beta-glucosidase |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
