

Human Esterase-D ELISA Kit | ESD elisa kit

Human Esterase-D ELISA Kit

CATALOG #
AAA205258

REACTIVITY
Human

PRODUCT SYNONYMS

Esterase-D; Human Esterase-D ELISA Kit; ESD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	297
Samples	Serum, plasma, cell culture supernate and other biological fluids
Assay Type	Sandwich
Detection Range	250 pg/ml-4000 pg/ml
Sensitivity	10 pg/ml

ADDITIONAL INFORMATION

Related Product Information for ESD elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of ESTERASE-D in the sample, This ESTERASE-DELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus ESTERASE-D concentration. The concentration of ESTERASE-D in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	182265
NCBI GeneID	2098

NCBI Official Full Name	esterase D, partial
NCBI Official Synonym Full Names	esterase D
NCBI Official Symbol	ESD
NCBI Official Synonym Symbols	FGH
NCBI Protein Information	S-formylglutathione hydrolase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
