#### Related Product Information for CXC-Chemokine Receptor 4 elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of CXC-CHEMOKINE RECEPTOR 4 in the sample, This CXC-CHEMOKINE RECEPTOR 4 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus CXC-CHEMOKINE RECEPTOR 4 concentration. The concentration of CXC-CHEMOKINE RECEPTOR 4 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
