

## Human Apolipoprotein M ELISA Kit | APOM elisa kit

Human Apolipoprotein M ELISA Kit

CATALOG #  
**AAA205561**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Apolipoprotein M; Human Apolipoprotein M ELISA Kit; APOM elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                   |
|-----------------|-------------------------------------------------------------------|
| Reactivity      | Human                                                             |
| Sequence Length | 116                                                               |
| Samples         | Serum, plasma, cell culture supernate and other biological fluids |
| Assay Type      | Sandwich                                                          |
| Detection Range | 25 ug/mL-400 ug/mL                                                |
| Sensitivity     | 1 ug/ml                                                           |

Standard Curve (Sample)

### ADDITIONAL INFORMATION

#### Related Product Information for APOM elisa kit

Intended Use: The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of APOLIPOPROTEIN Min the sample, This APOLIPOPROTEIN MELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus APOLIPOPROTEIN M concentration. The concentration of APOLIPOPROTEIN Min the samples is then determined by comparing the O.D. of the samples to the standard curve.

### NCBI AND UNIPROT INFORMATION
